Hi Guys,

Thanks for chatting with me today at Onepoto - I'm sorry to turn up in amongst all the racing!!

We are filming our TV commercial at Onepoto next tuesday 19th March.

I have attached an indication of the shots we are filming on the day.

We are looking for background boats, possibly around 6 - 8, which we will pay a fee to the owner for being there on the day & use of their boat in the BG.

We do also have a shot (see attached) which we need smaller sized boats for - 3 of them.

I was thinking that it may be better to use Electrons or Seawinds as they are not as long and the sails are not as tall.

I am also going to get the sails made in the 3 colours attached as these are the clients chosen preference - not white. I know this is not what would normally be done but its for TV.

As you can see by the attached sketch, the 3 characters need to be holding them beside the lake prior to putting them into the water - this is the reason I'm thinking Electrons or Seawards are a better size?

Do you know of any Electron or Seawind boats we could 'hire' for the shoot? And the owners would need to be happy with us changing out the sails.

I have Rob Nelson from the Westhaven Sailing club on board to manufacture the Sails in the colours chosen. He also races RC yachts - IMO's.

Can you please let me know if this is something you are able to help with, or if you know of anyone I could approach to help.

Of course, we will be paying for all help and hireage etc.

Many thanks for your help,

Rachel Lees, 021 435 660, Cherokee Films

Update:

I'm sorry the day for this shoot is now Thursday 21st in the afternoon from 2pm / possibly a bit later?
