

# RC TRANSMITTER RAIN PROTECTION GLOVE

## Instructions:

Pattern is approximate. Draw one to suit your transmitter. Cut from vynal cloth.

Cut out window, fold back edges, add clear plastic glazing and sew around to fix glazing in place.

Sew on velcro strips on inside to suit radio unit. They should grip around the handle.

Punch 3/16" inch hole for aerial. Align with your transmitter held in place by the velcro.

Punch 1/4" hole in window to suit neck strap. Align as above.

Fold and sew bottom edges.

Fold over on centre to be inside out, sew along sides. Turn right side out.

Add velcro strips or 8" zip to bottom edge.
